

Authorized Pentagon 2000SQL Partner

RedNight

Migrate. Manage. Empower.

What is Pentagon 2000SQL?

Pentagon 2000SQL has been a leading supplier of fully integrated enterprise software systems. Pentagon Software has been used primarily in the aerospace and defense industries, also in the electronics, power systems, metals and automotive industries.

The Pentagon 2000SQL ERP package is suitable for organizations looking for a single, feature-rich, user-friendly ERP solution to support the entire breadth of their business activities. It is designed for companies with complex and dynamic inventories as well as those requiring high levels of quality assurance.

“This is where one of the quotes will be placed when we get them.”

How RedNight Consulting can help

As an authorized Pentagon 2000SQL partner, RedNight Consulting is here to help run the application efficiently. RedNight is an expert in designing, migrating and running customer’s Pentagon server and infrastructure on Amazon Web Services. This provides a reliable, secure, enterprise grade IT environment for your server and data. No need to buy own and run your own servers any longer.

We can help with:

- Application implementation
- Cloud migration
- Security performance
- Setting up remote access
- Remote printing capabilities
- Ongoing support

About the partnership

RedNight Consulting has been working with Pentagon 2000SQL to provide their customers with simplified access to their inventory listing service. This partnership increases collaboration between the firms and allows users of both systems with benefits that include increased ease of use, efficiency, and accessibility.

“This is where one of the quotes will be placed when we get them.”

Benefits:

Dedicated support team

Keep your data secure

Fast deployment

Connect multiple onsite and stay at home workers all on Pentagon

Reduce costs

Pentagon System with backups
