

RedNight

Migrate. Manage. Empower.

Amazon Web Services for the produce industry

Benefits

- Run your core sales, inventory, warehouse management applications from Amazon
- Allow your salespeople to work from anywhere
- Stay connected from any device to your Warehouse Management System
- Get rid of the servers in your environment
- Maximize operational efficiency

About the partnership

RedNight Consulting has been working with Amazon Web Services (AWS) to provide produce companies with simplified access to technology to increase productivity and efficiency in daily operations.

We are experts in designing, migrating and running on AWS infrastructures. This provides a reliable, secure, enterprise-grade IT environment for your server and data. No need to buy, own, and run your own servers any longer.

Why AWS?

AWS takes your on the ground, physical storage devices and moves it to the cloud in a virtual network. That means you can easily access your files and information from any device with an internet connection. Save money on hardware costs and invest that money back into your business.

Be assured that your data is safe and secure while still remaining completely backed up. AWS is also easily scalable as your operations grow.

Advanced
Technology
Partner

"Moving into AWS gives us a peace of mind for our team. Having multiple locations, we know that the east coast will be up and running and that the reliability is a lot higher than when you have your own server on site."

– Robert Farnam, Catania Worldwide
